Description

Accenture Recruitment 2024

Accenture is seeking a highly motivated and experienced Embedded Software Engineer to join our dynamic team. As an Embedded Software Engineer, you will play a pivotal role in designing, developing, and testing embedded software solutions for a wide range of products, including consumer electronics, medical devices, and industrial automation systems. Your expertise in embedded systems programming, hardware interfacing, and real-time operating systems will be instrumental in delivering high-quality, reliable, and efficient embedded software solutions.

Accenture Jobs Near Me

Responsibilities:

- Design, develop, and test embedded software applications for a variety of embedded systems platforms
- Analyze and understand hardware specifications and requirements to ensure software compatibility
- Develop and maintain software documentation, including design specifications, user manuals, and test plans
- Conduct thorough testing and debugging to ensure software functionality, performance, and reliability
- Collaborate with cross-functional teams, including hardware engineers, system architects, and product managers, to ensure successful

product development

- Stay up-to-date on emerging embedded software technologies and trends

Accenture Careers

Skills:

- Strong understanding of embedded systems programming concepts, principles, and architectures
- Expertise in C/C++ programming, assembly language programming, and real-time operating systems (RTOS)
- Familiarity with various embedded systems platforms, such as ARM, Microchip, and TI
- Experience in hardware interfacing, including communication protocols and device drivers
- Excellent problem-solving and debugging skills, with the ability to identify and resolve complex software issues
- Strong attention to detail and commitment to accuracy
